EXPERIENCE

Personal Project

Personal projects that I've worked on provided at the link on the left.

Technical Stack: React - HTML - Bootstrap - Netlify

Desktop Virtual Assistant

A personalized virtual assistant named AVA. Can open multiple applications using python voice command library as well as some other simple tasks. I will continue adding features.

Technical Stack: Python - pyttsx3

Plant Social

E-commerce application built for plant connoisseurs. Allow users to purchase plants of all kinds.

Looking to expand this into a social network in the future.

Technical Stack: React - Redux - Firebase

LOL Rolodex

A League of Legends rolodex where the user can search through cards of all lol champions. Uses the lol dragon API.

Technical Stack: React - HTML - CSS

Eat N Rank

Restaurant ranking web application that uses google places API and autocomplete to locate the users searched restaurant.

The users can rank the restaurant and leave a review.

Technical Stack: JavaScript - HTML - CSS - Bootstrap

Wolfpack Travel

Mock travel agency website. Features a working form and was launched using Netlify.

Technical Stack: JavaScript - HTML - CSS - Bootstrap - Netlify

RunX

Android fitness application
