OPEN SOURCE PROJECTS

Snow Buddies (current)

Front End Developer
Collaborating with 5 other devs as a Front-End Developer at Snow Buddies using React Native Expo, RN Paper, Redux, and TypeScript. Our startup is redefining the skiing and snowboarding experience with a mobile app that facilitates seamless communication and meetups on the mountain

PERSONAL PROJECTS

Solar Study (current)

Study workspace web application designed to boost productivity. Incorporating timers for focused work sessions, seamless Spotify and YouTube integration to keep you motivated, and a task management system for tracking to-dos and taking quick notes. The app offers user registration and login. It's built using Vite, React, Redux, Express, and MongoDB, ensuring a smooth and efficient experience for users.

Plant Social

Explore a plant e-commerce store offering a wide variety of plants for purchase. Enjoy a seamless login and registration process with authentication powered by Redux and Firebase. The user interface is thoughtfully designed using styled components. Additionally, you can easily shop with our shopping cart feature, allowing you to add and remove items to your cart effortlessly.

Wolfpack Travel

Experience a simulated travel agency website crafted entirely with vanilla JavaScript, HTML, and CSS. It boasts a fully operational form ready for submissions. The website is live and hosted on Netlify, providing a user-friendly interface for your travel inquiries.

EDUCATION

B.S in Computer Information Systems | Software Engineering Concentration

DeVry University, 2021
Object-Oriented Programming, Web Development, DS and Algorithms, Mobile Development
